Post- Operative Instructions for Wound Care

- If wounds are covered with a tape dressing. leave in place until dressing comes off on its own
- When wound is exposed, clean gently with hydrogen peroxide soaked Q-Tips, four to five times daily, followed by application of Bacitracin ointment.
- Continue above process until wounds are completely healed (usually 10-14 days).

BE SURE TO CALL US IMMEDIATELY TO REPORT:

1. Temperature over 101 degrees Fahrenheit (Temperature over 100 degrees Fahrenheit is normal with wound healing)
2. Sudden swelling or discoloration
3. Hemorrhage
4. Discharge from wound or other evidence of infection
5. Development of any drug reaction
6. If you have any further questions, you are urged to call us at our office number: (317) 846-0846, answers 24 hours. Or contact Dr. Beeson at his home: (317) 690-2628

We will see you on _____ for your first post-operative visit.
